

# Clarian North Pumpkin Patch 5K presented by the Carmel Lions

**100% Will Go to Children Related Programs**

## DID YOU KNOW?

More than 60% of the children in the United States have not been examined by an optometrist or ophthalmologist by the age of 6. Some eye problems must be corrected before age 6 to prevent a lifetime of visional problems!

Most people think that when they take their children to the pediatrician that any of the problems that the child has will be discovered and treated. Most pediatricians have only had a small amount of training related to the eyes, so vision problems are more likely to go undetected unless they are referred to an optometrist or ophthalmologist. Carmel Lions can do the referring.

The hardest part of the problem with young children is that the child doesn't know that he or she has a vision problem. Because of this, Carmel Lions offer free eye screening to children in the community at scheduled daycare site screenings. The screening provides instant photographs of the child's eyes to determine the presence of possible eye disorders including farsightedness and nearsightedness, astigmatism, strabismus (misaligned eyes), anisometropia (unequal prescriptions) and media opacities (i.e. cataracts). No physical contact is made with the child and no eye drops or medications are used. This screening is approximately 85-90% effective in detecting significant factors that can cause a decrease in vision.

Carmel Lions have screened over 2,400 kids. Although the cost is FREE to the parents the Carmel Lions club incurs costs of \$3.00 per child. This program along with the Juvenile Diabetes Camp, Indiana Deaf Camp, etc. all benefit by your contribution and/or participation.
